PROFILE

Software engineering student from Prishtina building things on both sides of the stack. Spent two years at a national TV channel keeping live broadcasts running, did a semester abroad in Lithuania, and has been picking up new technologies ever since. Comfortable from putting together a frontend to wiring up a backend with proper auth and a database.

EXPERIENCE

Playout Operator

Jan 2023 – Feb 2026

TËVË1 · Prishtina, Kosovo

- Kept the channel running live every day. Any mistake went out to thousands of viewers, so you learn to stay sharp fast.
- Diagnosed and fixed technical issues during live broadcasts, often with no room for error and no time to think twice.
- Worked closely with the production team on scheduling, content ingestion, and live event coverage.
- Handled media servers, signal routing, and the playout automation system on a daily basis.

EDUCATION

BSc Computer Science — Software Engineering

Oct 2023 – Present

Kolegji AAB · Prishtina, Kosovo

Algorithms, data structures, OOP, databases, operating systems, web development.

Exchange Semester — Computer Science

Feb 2026 – Present

Šiauliai kolegija · Šiauliai, Lithuania · Erasmus Exchange

International academic exchange, studying alongside students from across Europe.

SKILLS

Frontend	HTML, CSS, JavaScript, React, Vue
Backend	PHP, Laravel, Java, Python, C / C++, C#
Data & Tools	SQL, MySQL, Git, Linux, REST APIs, Firebase, Supabase

PROJECTS

AthleteOS

JavaScript · Supabase · Stripe · PWA · GitHub Actions

A full-featured fitness PWA covering workouts, nutrition, sleep and body composition. Supabase backend with Postgres and Edge Functions, AI coaching via API, Stripe payments, Google OAuth, offline support via

service worker, and push notifications. Tested with Playwright and shipped via GitHub Actions CI.

Finance Tracker

Laravel · PHP · MySQL · Tailwind CSS · GitHub Actions

A full-stack finance tracking web app built with Laravel. Features expense management, data visualisation, and a clean UI with Tailwind CSS. Includes database migrations, unit tests, and a CI pipeline.

User Management System

PHP OOP · MySQL · PDO · Sessions

A login system with admin and user roles, bcrypt password hashing, and a MySQL database. Built using proper OOP patterns: abstract classes, interfaces, traits, and namespaces.

Board Royal

JavaScript · Firebase · PWA

Multiplayer board game PWA with 5 games including a full chess engine with castling, en passant and pawn promotion. Firebase Realtime Database for online multiplayer and auth, service worker for offline play.

Cloud Vault

JavaScript · Cloudinary API · PWA · Service Workers

A PWA for personal cloud storage backed by Cloudinary. Works offline via service workers and is installable on mobile as a native-like app.

CERTIFICATIONS

Java Programming

Cactus Training Centre · Prishtina, Kosovo
